CHICAGO GRAIN MARKET.

WHEAT AFTER MANY FLUCTUATIONS DECLINED 1-2¢.

Corn Was Easier, With a Moderate Dole, Oats Were Lower and Provisions Declined—Yesterday's Chicago Market.

Chicago, Ill., Aug. 11.—The wheat market today was weak and firm by turns on three or four occasions, and although it began up at a decline for the day, it nevertheless took the tone of the market at the time previous price was rather strong. Speculation, however, was not very active, and the market showed little change during the day before. The poor quality of most of the carloads offered in the cash market and the small demand for that kind of wheat gives an appearance of weakness in the cash market, which affects the speculators, although for the description of the article dealt for future delivery there is a good demand in the sample market both from elevator people and country millers, and that kind is extremely scarce. Corn was easier, principally because of the price of feed corn, which was lower and opened firm and remained so until yesterday, the end, when they weakened with just the only article higher in the end than it closed.

There was little improvement in the trade in wheat and the volume of business was very moderate. The decline displayed at the start and during the early part of the session was due to the fact that the grain rally in some later time figures showing above the decline. Expectations for the day were within the limit. Northern Northwest reports of lower prices in the sample market of a couple of banks, one in New York and the other at Duluth, tended to depress the price, and their temperatures were cooler. The market was also affected by the sale of outside speculative interest also continuing, consisting of a depressing influence. Some gains were made in the market, however, after the decline. The grain market report was interpreted as "bullish," showing a drop of 1-2 points in the condition of wheat when referred to the 40-cent August.

There was a slight increase in the yield of wheat in Southern Illinois. Rains were reported in Illinois, southern Indiana and southern Ohio.

Tales was but a moderate trade in corn, the market being rather quiet at times.

The feeding market was rather quiet.
